DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicant has amended the claims to include the limitations of previously allowed application 09/693,988 (now Patent Number 6,871,140).

The independent claim requires a user's location to be determined via a user equipment set with a location determining device and automatically transferred to a remote computer by wireless transmission. The computer utilizes the user's location to identify nearby commercial property from a commercial property database. The computer then automatically identifies features of said nearby commercial property that is missing from the database and sends and automatically prompts the user to input these missing features.

These features differentiate over the nearest US patent art of record (Roderick) in that the computer queries the user's location, determines missing information from the database and prompts the user to input this information via the equipment set without any prior input from the user. In other words, the system pushes down the request for missing information to the user rather than having a user request (or pull) the information from the computer.

These features differentiate over the nearest Foreign application of record (WO 99/56144 to Snaptrack) in that the computer queries the user's location automatically. Snaptrack requires the user to request information about a current location, whereas the present invention automatically retrieves the user's location and pushes the request for missing information to the user.

Art Unit: 3627

These feature differentiate over the nearest non-patent art (Weichert) in that the system stores commercial real estate data not residential. In addition, the information in the current database is collected via the user equipment sets wherein a computer queries the user's location, determines missing information from the database and prompts the user to input this information via the equipment set without any prior input from the user. The system of Weichert relates to residential real estate listings over the MLS system where data is input by real estate agents. The system never queries the user based on a location to input missing information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
